

DISIO

DISIO 5x5 Controller

The simple way to deliver custom control sequences—without custom hardware.

Have a packaged rooftop unit or a complex sequence requirement?

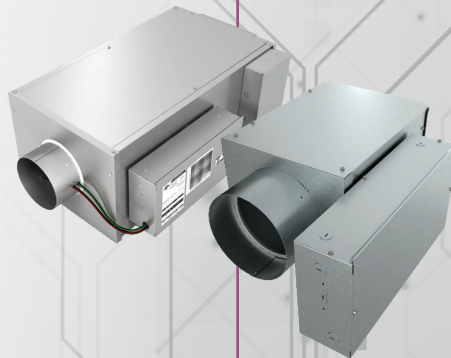

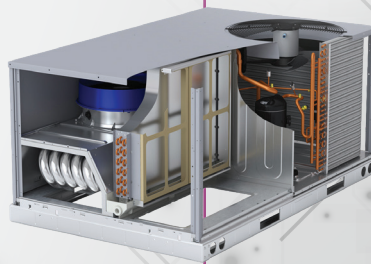

The new **DISIO 5x5 Controller** is a programmable BACnet controller with 5 universal inputs and 5 universal outputs—built to handle custom applications with ease.

With an onboard BACnet MS/TP port, the DISIO 5x5 can fully control RTU units using standard BACnet commands, and the USB-C port makes setup fast using DISIO Setup.

Preloaded with standard DISIO HVAC sequences, the DISIO 5x5 can also be customized to match your application.

KEY FEATURES

- *Handles complex sequences*
- *MS/TP BACnet port for reading and controlling other equipment*
- *Universal inputs [5]*
 - *Contact closure, 0-10V, 10k thermistor*
- *Universal outputs [5]*
 - *0-10VDC, 24VAC binary*
- *LED indicators for outputs, BACnet network and health*
- *RJ-12 DIN network for future expansion to other DISIO 5x5 controllers*

DID YOU KNOW?

DISIO controls are stocked and built in-house by **Price Electronics**—so you get ultra-fast delivery.
